**Ashland Water & Sewer Commission Meeting Minutes
29 May, 2021, 6 Collins Street, 3:00 PM
Work Session**

Open meeting - call roll. Present are, Mr. Hughes, here, Mr. Boyle, here, Mr. Cross, here, Mr. Cilley, late.

Rusty informed us about a former problem with the same type of results. The lead is not coming from our water supply, it is coming from individual housing. Where it is actually leaching from is not known, could be from poorly made parts. Rusty said we can up the Chemical a bit and that should take care of the problem. We will be sending in this months bill to all our water customers, hand outs explaining about lead in your water.

At 3:45 Mr Hughes was excused and left the meeting, Mr. Boyle made the motion to recess the rest of the meeting until our normal meeting on 7 June, Mr. Cilley seconded the motion, both in favor.

Adjournment.

Mr. Cilley made the motion to adjourn, Mr. Boyle seconded the motion, both in favor.
